

POSTERS

First author	Title	Number
T. Bárta et al.	Molecular mechanisms underlying reaction of human embryonic stem cells to DNA damage	22
M. Bezdičková et al.	Steroid hormone receptors within the human neocortex cells	23
O. Blanářová et al.	Platinum (IV) derivate LA-12 causes cell cycle perturbations in human colorectal carcinoma cell lines independently on status of p53	24
V. Brázda et al.	Cell-cycle analysis of the human cancer cell lines with wild-type p53 by UV, 5-fluorouracile, and Doxorubicin treatment	25
M. Číž et al.	The effect of serotonin on the oxidative burst phagocytes	26
I. Doležalová et al.	Intraspecific DNA content variability in wild barley (<i>Hordeum spontaneum</i> (C. Koch) Thell.) in relation to microclimate conditions	27
P. Gajdušková et al.	Genome position, amplification and gene expression changes in response to folate deprivation	28
V. Hájková et al.	Determination of blood phagocyte response to Glucomannan isolated from <i>Candida utilis</i>	1
J. Hřebačková et al.	Detection of chemokine receptors on the human normal and leukemic cells by flow cytometry	2
D. Cholujová et al.	The use of cytometric analyses in monitoring of BioBran and E-4IB effects	3
E. Jeklová et al.	Characterisation of changes in haematology, lymphocyte subsets and their activity in rabbits after experimental infection with myxoma virus	4
R. Jendželovský et al.	Inhibition of cytochrome P450 monooxygenase pathway induces apoptosis in photodynamic therapy of human colon adenocarcinoma HT-29 cells	29
M. Koláčková et al.	The impact of interleukin-10 on CD38 expression in cardiac surgical patients	5
R. Konopka et al.	Retinoic acid-induced neural differentiation of P19 embryonal carcinoma cells is effected by modulation of intracellular redox state	30
Z. Koubková et al.	The changes of intracellular lipids during induced differentiation and apoptosis of colon cells	6
L. Kovářová et al.	Phenotypisation of plasma cells in multiple myeloma and/or monoclonal gammopathy subjects	7
J. Králová et al.	Effects of selected H1-antihistamines on the generation of the reactive oxygen species by phagocytes	31
P. Mandáková et al.	Discrimination of low grade and high grade CD10 ⁺ B cell lymphomas by flow-cytometric assessment of CD71 and analyzing of cell cycle	8
J. Mikeš et al.	Comparison of sensitivity towards photodynamic therapy in the model of healthy vs. transformed cells of colon epithelium	32
A. Moravcová et al.	The effect of carvedilol on the oxidative burst of rat phagocytes	33

K. Müller et al.	Study of the gene transfer from the plant mitochondrion to the nucleus using flow-sorted nuclei	9
B. Pavlová et al.	Oligonucleotide microarray analysis of a porcine macrophage reaction to <i>in vitro</i> salmonella infection	34
M. Pekařová et al.	Effect of carvedilol on nitric oxide production induced by LPS in murine macrophage cell line raw 264.7	35
J. Procházková et al.	Double-color flow cytometry – unconventional use of conventional techniques	10
J. Richter et al.	FACS analysis of CD161 and NKG2D on various cell subsets in autoimmunity	11
Z. Řeháková et al.	Human peripheral blood lymphocyte subsets as irradiation dose indicators – a flow cytometric study	12
L. Sedláčková et al.	Neutrophil cd64 expression in sepsis	13
O. Slabý et al.	Correlation of selected microRNAs with histopathologic features of colorectal cancer	36
K. Souček et al.	Interaction between effects of vitamin D3 and nonsteroidal anti-inflammatory drugs in prostate and colon epithelial cells	37
E. Stránská et al.	Flow cytometry analysis of cell cycle in non-Hodgkin's lymphomas	14
V. Suková et al.	Chronic lymphocytic leukemia and small lymphocytic lymphoma have different intensity of cd52 antigen expression	15
P. Šimánková et al.	B lymphopoiesis and B-cell classification in pigs by polychromatic fluorescence microscopy and flow cytometry	16
H. Štěpánová et al.	Porcine gamma/delta T lymphocyte subpopulations: Production of interferon-gamma and tumor necrosis factor-alpha after nonspecific stimulation <i>in vitro</i> .	17
J. Tomala et al.	Expansion of activated CD8+ cells can be significantly increased by treatment with IL-2/anti IL-2 mAb complexes	18
D. Větvička et al.	Establishment of a cancer cell line stably expressing green fluorescent protein	19
D. Vokurková et al.	Elevated plasma endothelial microparticles in patients with psoriasis	20
P. Vaňhara et al.	c-Jun induces apoptosis of serum-deprived BM2 monoblasts by activating cyclin A-associated CDK2 kinase	38
J. Zatloukalová et al.	Cyclin A as a marker of disruption of contact inhibition in rat liver progenitor cells	39
P. Zelníčková et al.	Intracellular cytokine detection by flow cytometry in pigs	21
P. Suchánková et al.	Unbiased isothermal amplification of DNA from flow-sorted plant chromosomes	40

Presenting authors of posters No. 1-21 are kindly requested to attend their posters during the Poster Session on Sunday (16:00 – 18:30). The second Poster Session, for presentation of posters No. 22 - 40, is scheduled on Monday (16:00 – 17:00).
